Q: How to make an API for an Android app I am a newbie in Android and have a question about 'How to make an API for an Android app?' I already started to build an Android app, and I am sure that the source code is a little bit complex for any one. I am asking about how to make an API to control the connection between any computer and my app. In addition, I want to make a website for the app so that I can easily access the app from the website. First, can you give me a simple tutorial on how to make the API and can you give me a hint on how to make the website for the app? Thank you, A: My suggestion is first to read a very basic book about programming, then I would suggest to write a mail client app. Then I would suggest to write a gallery app and a contact manager. You can then use apache for the website. You can check these links for the API documentation: Google documentation - The official documentation from Android: FILED NOT FOR PUBLICATION MAY 12 2014

I tried to search for the download from internet but was not able to get the format.Wendy Ostrander is the Director of the Family Wisdom Network, a division of Inspired Wisdom Ministry. The curriculum, which she developed, is based on the insights she has gained through 40 years of personal experience, as well as the wisdom of women throughout history, and the lives of the exceptional women she has worked with. The curriculum is designed for women with children (or for mothers-to-be) and has been downloaded in 54 countries around the world. For more information, please visit www.inspiredwisdomministry.org or contact Wendy at wendy@inspiredwisdomministry.org. Sunset Over the Hill Sitting down to write this, I'm not sure where to begin. I am literally overcome with grief. To start with, I must tell you that this was the last time I was in a relationship. I'm sorry to say that. I was raised in a family of five boys. My Dad was considered a pretty tough guy back in those days. He built boats for PCH (I remember my Mother saying he bought just as many screws as he could afford because he knew that when they started flooding the market, they could be priced out of business).
